

## SkillSonics CONNECT – digital exchange and tuitions

Mobility, international exposure and the capacity to collaborate in a digitally connected world are prerequisites for today's work environment. In view of the international bonds between enterprises in the globalized economy, work experience abroad is gaining in importance.

**SkillSonics CONNECT** enables apprentices, students, trainers, and professionals to gain international experience in an uncomplicated and cost-efficient way.

The program brings participants together with their professional colleagues from other countries, in order for them to receive remote training through tuitions, or to exchange ideas on a professional or cultural topic. We can also organize and accompany international project stays.

That's how we support the digital exchange in vocational education and training:

Good to know:

- The 8-12 exchange sessions can be organized flexibly, according to requirements
- The exchange and tuition can take place with regard to theoretical or practical technical training, as well as outside of class.
- Collaborations are organized with a company or institute administrator and their trainers/teachers, who mentor the students or delegate the coaching to SkillSonics.

**SkillSonics CONNECT** is suited for

- Corporate Social Responsibility CSR projects
- Institutes, engineering colleges, skilling centers
- Enterprises
- Existing SkillSonics clients

### Students and trainers gain:

- Insights into the global world of work
- expertise from international peers
- communication and English-language skills
- A reduction in the number of obstacles in interacting with potential co-workers from different cultures
- autonomy and solution finding competencies

### Companies and institutes gain:

- International know-how about the industry
- A global perspective and deeper understanding of international competences and standards
- Cooperation with an institute or company abroad and development of an international network and international projects
- Promotion of the company and its international recognition
- Increasing the company's attractiveness
